

Project title: 2023 Off-Station Winter Wheat Trial

Objective: To evaluate the performance of selected winter wheat varieties in production environment in northwestern Montana.

Personnel: D. Larson, J. Pavelka, C. Beiermann, S. Mondal, J. Torrion

Summary:

There were 25 entries of winter wheat planted as farmer-field trial. This trial was seeded on 6, October 2022. The winter wheat study located off West Valley Rd in NW Kalispell, MT. No data are presented this year for this location. The farmer-contracted harvester inadvertently harvested this off-station trial.
