COMMENTS (PLEASE PRINT)

1. Identify specific outcomes and impacts during the life of the existing project. For new projects, what are the potential outcomes and impacts?

2. Relevance and importance of research to department, state, regional, and nationally established research priorities and the discipline. Specify impacted clientele.

3. Methods are clear, complete, and appropriate for the proposed research.

4. Adequacy of research proposal design, data analyses, and reporting plans for achieving stated objectives.

5. Adequacy of literature review and PIs knowledge of research field.

6. Proposed research is accomplishable and is within the constraints of available resources.

7. Potential environmental, economic, and/or social impacts that should be considered.
